

OB152 Bakhlfar

Back Protector

MAX PROTECTION combines three elements to create the most advanced back protection system available to everyday motorcyclists: HEXCORE, AID, 3DX

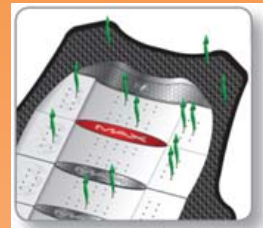

Hexcore is a patented technology which dramatically reduces the effects of an impact. The unique combination of select materials and honeycomb structure enables Oxfords's back protectors to exceed the stringent CE Level 2 standard.

AID (Absorption Insert Disc) The Absorption Insert Disc uses a softer density material to link the plates together. This allows the protector to mould comfortably to the shape of your back, while absorbing the flexing/impact of the protector in the event of an accident.

3DX TECHNICAL IMPACT FOAM 3DX has proven impact absorption qualities and provides a cushion between the protector plates and your spine, working with the HEXCORE to maximum effect. In addition, this lightweight material allows heat and moisture from the rider to pass through and be wicked away by passing air flow for a more comfortable ride

Sizes & Codes:

- OB150 Back Protector 7 plate XL Mens race
- OB151 Back Protector 6 plate Large Mens
- OB152 Back Protector 6 plate Medium Mens
- OB153 Back Protector 6 plate Large Womens
